

Access rights by user type for SAP® Business ByDesign™

What is SAP® Business ByDesign™?

The SAP® Business ByDesign™ solution enables customers to run their entire business with a single, cloud-based application. SAP Business ByDesign is ideally suited for small to medium size companies and subsidiaries of large companies. Customers can get a fast start with a clearly defined scope and then activate additional functionalities to manage processes such as financials, customer relationships, human resources, procurement, and supply chain. SAP Business ByDesign is a software-as-a-service solution that is delivered in the cloud and does not require an additional IT investment.

A Compelling, Subscription-Based Pricing Model

SAP Business ByDesign is licensed through monthly subscription fees, calculated on a named-user basis. The pricing schedule identifies three categories of users: self-service users, team users, and enterprise users. Pricing and functionality vary for each category. You don't need to worry about software system maintenance; all core services such as backup, recovery, and regular upgrades are covered by SAP and included in the monthly fee. You can choose to deploy the complete solution, or you can address your immediate business needs first, and grow from this foundation.

Self-Service Users

These users make use of SAP Business ByDesign to perform core self-service office tasks such as time and expense reporting, purchasing, and travel management. Additional role-specific tasks are available depending on the type of self-service user.

General Features

Included: Upgrades, 24x7 support, backup, recovery, system management, mobile access, SAP App Center integration, Microsoft Excel integration

Additional Fees

Dedicated server
Test Instance for own extension development
Development Environment (Cloud Application Studio)
Additional Country Support (3 country versions included)

Team Users

Team users/Team leaders use core customer relationship management (CRM, SRM) or Project Management processes in the SAP Business ByDesign solution to manage team activity.

Enterprise Users

Typical enterprise users are office workers, planners, accountants, or salespeople. A standard enterprise user gets a rich variety of core functionality including customer relationship management, purchasing and sourcing, financial management, human resources, and more. The enterprise user for supply chain management deploys additional functionality to manage physical inventory, supply chain planning, and manufacturing.

Included Items

Storage, upgrades, 3 country versions (out of 19), system management, support and backup, and recovery are included in the monthly subscription fee.

SAP partners, available around the world, can tailor the solution to your specific needs or industry. They can provide a growing range of services and certified add-on solutions that you can select and activate using the online [SAP App Center](#).
